

COSMETIC TATTOOING

PRE CARE INSTRUCTIONS

Please make sure you read the following instructions to assure the best results for your procedure. It is very important to refrain from drinking **alcohol, aspirin products** and any like **blood thinners**, as it increases bleeding, for **24 hours prior** to your appointment. All of these increase bleeding; excessive bleeding during the procedure can negatively affect the healing and longevity of your semi-permanent makeup application. In some cases, the application will need to be permanently stopped. Please avoid **energy drinks and caffeine prior** to your appointment. Not having caffeine in your system will help you to relax much more easily, as well as help to relax the facial muscles in the areas to be worked on.

Brows: No **accutane** (acne RX) use within 1 year and no **botox** injections in areas to be treated **prior** to the treatment for 3 weeks.

Lips: Please make sure to exfoliate lips **everyday for a week prior** to the appointment. You can do this with coconut oil mixed with sugar. Dry lips **cannot** be worked on, so it is extremely important to stay hydrated and keep lips moisturized everyday. **Aquaphor** ointment is highly recommended. Lip filler injections can be done 3 weeks prior to your appointment.

*If you are prone to cold sores/fever blisters, lip tattooing can cause outbreaks. It is your responsibility to take your prescribed antiviral medication 3 days prior to lip service and after to prevent any outbreaks. If you are currently having an outbreak of cold sore, please reschedule your lip service until it has cleared.

APPOINTMENT AND CANCELLATION POLICY

Please read our cancellation policy, as a courtesy to Lux Lashes & Brow Designs, in order to efficiently accommodate other clients and artists for appointments.

If you need to reschedule your appointment, a **48 hours notice is required**. A **one time** courtesy rescheduling is allowed with proper notification (48 hours), anything less then that you will **forfeit your booking fee/deposit**. Booking fee and/or deposits are **required** to confirm your appointment and are **nonrefundable**.

POST CARE INSTRUCTIONS

EYEBROWS :

*Your artist will tell you which aftercare to follow starting Day 1 only and then as followed. It is dependent on how your procedure went.

_____ **DAY 1 (DRY HEAL):** Keep eyebrow area clean and dry as much as possible for 48 hours. Limit the time in the shower to avoid getting brows wet, apply the ointment to repel water. Make sure ointment is a very thin gloss only. Do not touch eyebrows with unwashed hands or fingers to prevent infections.

----- OR -----

_____ **DAY 1 (MOIST HEAL):** Cleanse eyebrow **gently** to remove lymph fluid build up, **no rubbing or scrubbing**. Use mild gentle soap 3 times a day, **PAT dry** with soft facial tissue, and gently reapply healing product given with a new Q-Tip each time. Only a small amount is needed, a size of a grain of rice, per brow to keep it from over drying. Your brows should not be glistening with the healing product, **too much will suffocate your eyebrows**. To avoid infections, keep brows clean at all times do not touch eyebrows with unwashed hands or fingers.

DAY 2-14: Follow same cleansing method and aftercare but **only 2 times a day** until **scabbing is finished** and **complete** for both brows. Once scabbing begins, let scabs come off by itself, **do not pick** them off. Scabbing generally comes off in small patchy sections. The skin underneath **should not** look raw and pink if the scab is coming off naturally.

- Do not use any Retinol-A, Glycolic Acids, Peroxide, or Neosporin products while healing
- Do not scrub, rub, or pick at your eyebrows.
- Do not expose areas to direct sun or tanning beds. Wear a hat if out in direct sun for longer than 30 minutes.
- Avoid any facials, swimming, pools, saunas or open water until all scabbing and peeling is complete.
- NO heavy exercising the first 3-5 days as sweat contains natural salt and will result in loss of pigment by pushing the pigment out.
- No make-up on the eyebrows until scabbing is 100% complete.
- Do not tint or wax eyebrows for the next 14 days.
- Do not sleep on the eyebrow areas or rub, this will result in loss of pigment.

****FAILURE TO FOLLOW THESE INSTRUCTIONS MAY RESULT IN LOSS OF PIGMENTS, SCARRING, OR INFECTION. ****

WHAT TO EXPECT AFTER:

- Slight swelling, thickness, and/or redness for 1-2 days following the procedure.
- It is **normal** to lose approximately 25% of the color and up to 50% of hair strokes (microblading) during the healing process (30 days), which is why a follow up touch up is **required** to complete the look and process.
- After the initial procedure, the color will appear too dark and wider than the **healed results**. After scabbing exfoliates, it will appear too light or non-existent, it is normal. The color will reappear to the surface and show more day by day, because the color will come from the dermal layer of the skin to the epidermal layer of the skin, this is why complete healing is 30 days to see final results.
- Healing takes up to **30 days** even after light flaking or scabbing is over, please be patient and trust the process! Follow up appointment is between 4-8 weeks, touch up is often **required** to even out symmetry, color or hair strokes.

LIPS :

DAY 1-7: Keep lips moisturized with Aquaphor ointment every 30 minutes, DO NOT let lips dry out. Before bedtime, gently cleanse lips with lukewarm water, pat dry, and reapply Aquaphor ointment. It is important to remove the lymph fluid (clear fluid) from the surface of the lips to avoid heavy scabbing. Repeat this aftercare until **ALL** scabbing is complete. Bruising and swelling will subside within 24-48 hours. Drink liquids from a straw.

Healed results take **30 DAYS** and will be up to 50% lighter than initial color, which is expected and normal. Touch up is recommended at **6-8 weeks** to finalize targeted color and retention for longevity.

Please avoid:

- Makeup on or near lips
- Excessive sweating
- Saunas, pools, sunbathing
- Kissing
- Spicy foods
- Scrubbing, exfoliating lips, or picking scabs or dry lips
- Any other ointment other than Aquaphor for best results

CONSENT TO COSMETIC TATTOOING TREATMENT

NAME: _____

DOB: _____ AGE: _____

ADDRESS:

PHONE: _____ EMAIL: _____

TREATMENT: _____

LOCATION OF TREATMENT(S): _____

NUMBER OF VISITS REQUIRED/RECOMMENDED: _____

COST OF TOTAL PROCEDURE: \$ _____

COST OF ADDITIONAL 4-8 WEEKS SESSION IF NEEDED: \$ _____

BOOKING FEE/DEPOSIT (NON REFUNDABLE): \$ _____

I, _____ am over the age of 18, am not under the influence of drugs or alcohol and desire to have cosmetic tattooing performed. The general nature of cosmetic tattooing as well as the specific procedure to be performed has been given to me.

Initials _____

I have been informed of the nature, risks, and possible complications and consequences of permanent skin pigmentation. I understand the permanent skin pigmentation procedures carries with it known and unknown complications and consequences associated with this type of cosmetic procedure, including but not limited to: infection, allergic reaction, scarring, inconsistent color, and spreading, fanning or fading of pigments. I understand the actual color of the pigment may be modified slightly, due to the tone and color of my skin. I fully understand this is a tattoo process and therefore not an exact science, but an art. I requested the cosmetic tattooing procedure and accept the permanence of the procedure as well as the possible complications and consequences of the said procedure. I understand that while this is sometimes referred to as semi-permanent in nature, due to each individual's reaction to pigment, the length of time pigment is present cannot be guaranteed. In some cases, pigment will be permanent.

Initials _____

I understand that this procedure may need multiple sessions to reach the desired looked and retention due to way the skin heals and differs per client. Each session I will adhere to the same pre- and post- care instructions given to me. Total cost and numbers of the procedure will be given to me and recorded. Any additional sessions will be further evaluated and discussed but may not be covered in cost with initial agreement.

Initials _____

I understand that prior to the implantation of pigments, I have looked and agreed upon the shape and color of the treated area. All needles and cartridges are wrapped, sterile, and disposed of after each client.

Initials _____

I understand that if I have any skin treatments, laser hair removal, plastic surgery or other skin altering procedures, it may result in adverse changes to my permanent cosmetics. I understand I shall disclose to the technician of my permanent skin pigmentation. I acknowledge some of these potential adverse changes may not be correctable.

Initials _____

I have received pre- and post procedure instructions verbally and written and I will strictly adhere to such instructions. I understand that my failure to do so may jeopardize my chances for a successful procedure and outcome.

Initials _____

I understand that the taking of **before and after photographs or videos** of the said procedure are a condition of such procedure **required** by the company's insurance and any may be possibly used for portfolio and advertisement use. I certify I have read and initialed the above paragraphs and have had explained to my understanding this consent and the procedure process.

Initials _____

I accept full responsibility for the decision to have this cosmetic tattoo work done and will not hold the artist or company responsible in any way.

Initials _____

I have read and understand the company's appointment & cancellation policy.
